Attention team:

Please keep a close eye on Tropical Storm Nine (Helene) as it approaches the Florida coast. The storm is expected to strengthen into a major hurricane by Thursday, making landfall in the Big Bend area of the Florida Panhandle. Current forecasts indicate that it is a fast-moving storm, it will impact the Miami and Tampa areas before entering land in northeastern Florida, and then shifting towards Jacksonville and Savannah.

It's crucial for offices in these areas to begin preparations today. Helene is anticipated to bring life-threatening storm surges of 10-15 feet, strong winds, heavy rainfall, and significant flooding. Please follow local advisory warnings and evacuation routes.

We recommend activating Emergency Phone Alerts from your local government to receive real-time warnings about potential dangers. Stay indoors and avoid risks from flying debris, fallen trees, and flooding. The employee portal has important area information for employees and remember to check in with your managers.
